CELEBRATING 50 YEARS 1958 - 2008

COMMERCIAL POOLS • WATERPARKS • RESIDENTIAL POOLS

## IMPERIAL PALACE - CEBU PHILIPPINES

This hotel resort and waterpark is currently under construction on the coast of Cebu City in the Philippines. It is to be a 5-Star 1,000 room resort. It's being developed by BXT Corp., a Korean Company. The owner, Mr. Park, and his son are large developers from Korea.

Family Fun was chosen to furnish the wall for the lazy river, the activity pool and the kiddie pool. A portion of the lazy river requires a raised wall to accommodate the wave area.

Uniwall is stacked an additional 2 feet in height. All in all, approximately 2,800 feet of wall is used on this project. There is also a swim-up bar incorporated into the river. We also furnished all the hydraulics and filtration drawings, as well as the pumps. This project is scheduled to open in December. Family Fun assisted in the supervision and construction of the project.

## — POOLS...

# ...INSIDE POOLS

The pool on the left was a concrete bumper boat pond in Richmond, VA. It had constant maintenance issues and rather than demolish it, we built a pond inside it. The new bumper boat pond has 14 boat docks and is very freeform. All new plumbing was run. The method used was anchors, threaded rod, nuts, anchor brackets and a bottom track. This method is most common for building pools inside of pools and for roof top projects. If you would like details, please call. The new pond is beautiful versus a big concrete box. We would like to thank Gary Henshaw of the park for choosing Uniwall and for his assistance.

The other pool inside a pool is a country club. It was 12 feet deep and 25 meters long. We raised the deep end and attached brackets to the existing walls to support the new Uniwall. Again, rather than paying for the expensive demolition, we built inside the existing structure. In this case, we moved the walls in 4-1/2 feet, but if necessary, we can be within 3 inches of the existing structure. They also had a small kiddie pool. We added our wall system along with a mushroom, frog slide, jets and bubblers.

Pictures of the completed projects can be seen on the back cover. As you can see, Uniwall is not only for new projects but also does an outstanding job on renovations.
