Celebrating 55 Years 1958-2013

Waylons Water World

Waylons is Yuma, Arizona's first waterpark. It is owned by Becky and Brice Zeller. The park was named after their grandson. The park features a 680' center line lazy river with Uniwall, multiple slides, a large children's play structure and a children's pool. Extra care was taken when building this project because it is considered an earthquake zone. Family Fun not only furnished the wall but also the filter equipment and movement pumps. Becky and Brice are going to continue to expand the park. Their goal is to make this a Family Fun destination point and attract visitors from around the country. We appreciate the opportunity to work with the Zellers and look forward to future projects with them.

Mossing Pools

Larry and Donna Mossing entered the pool business in 1965 in Toledo, Ohio. They tried other types of pools but in 1969 became exclusively a Family Fun builder. Larry was one of Family Fun's original "Poolsmiths." Larry's son David and his wife, Kim took over the reigns in 1998. They have done an outstanding job growing the business and continuing to be Toledo's premier builder.

They now have two stores and are a member of the Carecraft buying group. Family Fun was very fortunate that our paths crossed in 1969. We hope our association continues for many years to come.

Pools through the years

Uniwall and Mossing construction

Lions Water Adventure

This park is located in Kinston, NC. Bill Ellis began the ground work for this project in 2009. The budget and size of the park grew dramatically due to Bill's hard work, the generosity of the community and Woodsmen of the World.

The park opened this year and has been an amazing success. So much, that there is already talk of expansion. The park features a 550 ft. center line lazy river, 3 slides, a kiddie lagoon and a lap pool.

Uniwall was chosen for the lazy river and furnished the pumps and filters for the project. Greenville Pools was the contractor for construction of all the pools.

We would like to thank Bill for choosing Family Fun and look forward to working with him on the next phase.

Isle Of Margarita Ramada Worldwide Resort

This resort pool was built on an island just north of Venezuela. It is a beautiful resort that is located on the Caribbean Sea. It was sold and built by ParquesAcuaticos. The owner, Nelson Oswaldo Yepes, represents Family Fun in South and Central America. The pool features a slide pool, a swim-up bar, a wading area and is 1,267 sq. meters (13,638 ft²) in size.

We look forward to working together with ParquesAcuaticos on many more projects.
